

MR. MANHOLE

Patent Pending

MANHOLE LEVELING SYSTEM

MANHOLE LEVELING SOLUTIONS FOR MUNICIPALITIES AND FACILITY OWNERS

PJ Brindle can rebuild the damaged manhole's chimney to be perfectly level with the grade of the street or other surface. Groundwater infiltration due to deteriorating manholes can negatively impact the environment and draw attention from the EPA, which makes the repair of manhole frames, lids and chimneys a necessary maintenance strategy. PJ Brindle utilizes the Mr. Manhole System to safely and accurately repair and level both on and off-road manholes and valve boxes.

P.J. BRINDLE

GENERAL CONTRACTING

570.226.0499 pjbrindle.com
Lake Ariel, PA

Hydro Vacuum Excavation is an effective alternative for digging where heavy machinery is not practical. Conventional methods such as backhoes and excavators can damage underground utilities, cause delays to construction and costly fines for contractors.

PJ Brindle has hydro excavation capabilities
