

# OUR COMMITMENT

Our customers are our business and we listen, respond and perform accordingly with an emphasis on:

- Honesty and Integrity
- Creativity and Economy
- Concise Communication

At PJ Brindle, we offer competitive pricing for quality work and unparalleled service. Our dedicated and skilled professionals treat your project as their own and concentrate on the details. Our communication with you is clear and concise, we listen to your requests and respond promptly to changes, new information and problems. We enjoy the challenge of any and all projects and will work with you to creatively and economically find a solution. Our service is beyond expectations and we build our reputation on honesty and integrity. Contact us now for a bid on your upcoming project.

**Can you dig it? We can!**

# LEAK DETECTION & WATER SYSTEM MANAGEMENT

Undetected leaks in a water system can quickly escalate into an emergency. Leak detection is a necessary component of effective water distribution systems management. Leaks can be visible and non-visible, and the accurate determination of the location of leaking water pipes within a supply

system is extremely important. State of the art location equipment allows PJ Brindle to locate, analyze and repair the leak. PJ Brindle provides leak detection service for many types of irrigation and water distribution systems; golf courses, industrial parks, and public and private water systems.

Proper water distribution management is essential for the optimization of your system. PJ Brindle works to manage your system so it functions in the most efficient way by incorporating routine maintenance and repair services as part of their comprehensive plan.

## SITE DEVELOPMENT

The success of our site development services depends on our comprehensive planning, prudent management, and high performance equipment. The capabilities of our fleet of large capacity excavators, loaders and dozers allow us to complete the job successfully.

Project quality and success begin with superior site work. Through use of an effective site plan, PJ Brindle can create a project to meet your needs.

P.J. Brindle General Contracting has been serving the Lake Region of Northeastern Pennsylvania since 1989. We are a family owned and operated company committed to customer satisfaction. Our ability to complete projects with our own employees, tools and machinery helps us to better serve our clients. We welcome the opportunity to discuss your contracting needs at any time.
